CURRENT PRICE LIST

OF PASTURE SEEDS, FODDER CROP SEEDS, BIRD SEEDS AND BULK VEGETABLE AND FLOWER SEEDS

LIBRARY RECEIVED AUG 14 1937 U. S. Department of Agriculture

ISSUED MONTHLY FOR ALL ENGAGED IN COMMERCIAL PRODUCTION

AGRICULTURAL SEEDS.

YATES' SPRING FODDER LIST is now published, and copies are being posted out to all our valued clients who have purchased or enquired about Fodder and Pasture Seeds and Peas and Beans. If you do not receive your copy during the next few days, please advise us. This booklet will help you plan your spring and summer sowings.

We have included as many spring sowing lines in this price list issue as possible, but as the spring advances, subsequent issues (Yates' Current Price List is issued every month) will offer fuller supplies. Always write or 'phone for latest quotations if what you want is not in this list.

We herein offer choice lines of Australian-grown and carefully selected and approved Sudan Grass, Japanese Millet, and some of the main lines of Maizes and Sorghums; those varieties not yet priced will be included in our next price list to be published August 1st.

We still have a full range of Grasses, Clovers, and Fodder crops, usually sown in autumn and winter, and those in cool highland districts will still be interested in some of these for early spring sowings. White Tartarian Oats will be of special interest in this respect, and we offer a fine sample of seed.

Supplies of Garden Peas will be very short before spring sowings are completed and we urge all to make sure of their supplies at current rates. A full range of Beans is priced for those interested in making very early sowings. The varieties Brown Beauty and New Discovery will be of special interest, and also trials should be made of Burnley Selection Canadian Wonder. This strain has been fostered by the Department of Agriculture, Victoria, and it has been found almost completely resistant to the troublesome Halo Blight disease. It may be, however, that the pods will be found to be slightly shorter than standard Canadian Wonder.

SEED POTATOES are not priced in this list. We will have available in a few days a special list of Seed Potatoes and Artichokes, etc. A copy will be sent to all enquirers, or special quotations made on request.

Market Gardeners and Commercial Growers of Vegetable Seeds

See Section 12 for all Bulk Prices

"Yates' Seasonal Notes and Trial Ground Observations for Market Growers." This publication is now available, and we urge all bona fide Market Growers who do not receive a copy direct from us during the next fortnight or so to write for this publication, which, we feel sure, will be of unusual interest to them.

We have included in this issue prices of several new vegetable varieties which will interest Market Gardeners. Full descriptions of all these will be found in our "Seasonal Notes and Trial Ground Observations," and we urge all interested growers to give these a trial.

Some growers will now be making further sowings of Beet, and we would again like to draw attention to our Derwent Globe and Early Wonder, two first-class market sorts.

We have a very fine range of Tomatoes for those making early sowings, and can strongly recommend our Earliwinner as a really high-class early variety. Bonny Best and Break-o'-Day are two excellent sorts to mature a little later, and all do exceptionally well on stakes.

Commercial Flower and Seedling Growers

See Section 15 for Prices of all Seasonable Lines in Bulk Lots

We have included in this month's publication some of the most important lines for Spring planting. New Crop seed is now available of all varieties mentioned, but while it is a little early for sowing it is advisable to secure your supplies to avoid disappointment. We consider our strains to be the choicest procurable, especially the mixtures of Zinnia Dahlia Flowered, Zinnia Giant Double, Phlox Drummondii Derwent Strain, Asters all of which are made up from separate colours. If you do not receive a copy of our new publication "Seasonal Notes," giving reports of our trial ground work, write and one will be posted immediately. Kindly state whether Flower or Vegetable issue is required, as we have booklets on both sections.

APPROXIMATE QUANTITIES TO SOW PER ACRE and weight in lbs. of varieties quoted by the bushel.

GRASSES.

Grasses are usually sown in mixture with other grasses and clovers. The quantity of mixed grasses and clovers to sow per acre must vary according to the quality of the soil and climate. The following approximate figures may assist. Full information and recommendations sent on request and on receipt of the necessary brief particulars.

	Per Acre.
Coastal rich soils	20-25 lbs.
Coastal poor soils	12-18 lbs.
Tablelands rich soils	18-20 lbs.

AGRICULTURAL SEED SECTION

CONDITIONS OF SALE AND NON-WARRANTY.					PRICES AND QUANTITY RATES.				
We believe that all Seeds Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such Seeds Bulbs or Roots will correspond with the description under which they are sold and we make all sales subject to this condition. We further give no warranty expressed or implied as to their growth description quality or productiveness and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us and any money paid to us will be refunded.					All quotations (whether by letter or printed Price List) are subject to prior sale and to prompt reply, otherwise to market fluctuations and to change without notice. If price is reduced between quotation and receipt of order, the lower rate is charged. The reductions in rates shown in this List for specified larger quantities apply only when the respective quantity is ordered at the one time and for the one delivery. Attention is directed to the following explanation of the dagger signs (†) and dash signs (—) which appear in the column prices. For those quantities which are not priced but are marked with a dagger (†) we invite applications for special quotations which will be sent by return mail, and which will, in most cases, show a concession on the prices quoted in this List. These concession rates will be of special interest to large quantity buyers. The dash mark (—) appearing in the price columns is intended to indicate that at time of going to press we are unable to quote definitely for the quantities so marked, but on receipt of special enquiries, we will gladly furnish latest information as to further supplies, and, if possible, make forward quotations.

FORWARDING.

All lines on this sheet are quoted nett, f.o.r. or f.o.b. Sydney and we deliver seeds to rail or wharf Sydney, after which goods are on customer's account and at his risk. Orders sent by goods train are consigned Carriage Forward (except to unattended platforms) unless we are instructed at time of order. Orders sent by steamer, passenger train or to unattended platforms per goods train must be prepaid and the approximate value of freight should be included with remittance.

SUBSTITUTING.

On account of the difficulty in obtaining full supplies of many lines, and the failures of crops of others, we may, if unable to supply the exact variety ordered, substitute for it some other variety of a similar nature, which will, in our opinion, give satisfactory results. If this is not desired, please mark order clearly: "DO NOT SUBSTITUTE."

TERMS.

Our terms are strictly prompt nett cash, and orders should be accompanied by remittance for the approximate amount of the order (including freight if the goods are required by coastal steamer or passenger train, or if to be consigned to unattended platforms). When buyers have established an approved account with us, or if satisfactory Sydney business references are given, we will charge to customer's account on the understanding that customers remit promptly on receipt of invoice. When remitting, please add exchange to country cheques.

For meaning of daggers (†) and dashes (—) in price columns, see special note at top of Page 2 in reference to Prices and Quantity Rates.

**FOR MARKET GARDENERS, NURSERYMEN and ALL COMMERCIAL GROWERS
OF VEGETABLES FOR MARKET, CUT FLOWERS and SEEDLINGS****CONDITIONS OF SALE AND NON-WARRANTY**

We believe that all Seeds Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such Seeds Bulbs or Roots will correspond with the description under which they are sold and we make all sales subject to this condition. We further give no warranty expressed or implied as to their growth description quality or productiveness and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us and any money paid to us will be refunded.

ARTHUR YATES & CO. PTY. LTD.

PRICES AND QUANTITY RATES.

All quotations (whether by letter or printed price list) are subject to prior sale and to prompt reply otherwise to market fluctuations and to change without notice. If price is reduced between quotation and receipt of order the lower rate is charged. The reductions in rates shown in this list for specified larger quantities apply only when the respective quantity is ordered at the one time and for the one delivery. Attention is directed to the following explanation of the dagger signs (†) and dash signs (—) which appear in the column prices. For those quantities which are not priced but are marked with a dagger (†) we invite applications for special quotations which will be sent by return mail and which will in most cases show a concession on the prices quoted in this list. These concession rates will be of special interest to large quantity buyers. The dash mark (—) appearing in the price columns is intended to indicate that at time of going to press we are unable to quote definitely for the quantities so marked but on receipt of special enquiries we will gladly furnish latest information as to further supplies and if possible, make forward quotations.

Customers will please note that we do not execute orders in bulk or by weight to any value below 1/- per variety; also that if quantities smaller than the minimum weights quoted herein are desired a slightly higher price rate is chargeable, and in all cases is subject to the minimum of 1/- per item (otherwise packets will be sent). Please carefully write "oz." or "ozs." and "lb." or "lbs." to avoid confusion with "dow." and other common abbreviations.

DELIVERY AND CARRIAGE CHARGES.

Delivery of all seeds, plants and roots sold by us is made at the Post Office, the Railway, or the shipping wharf at Sydney, N.S.W. Carriage or postal charges are free and are prepaid by us on all Bulk Vegetable and Flower Seeds (except Beans, Peas and Mushroom Spawn, which are carriage extra). When goods are quoted carriage free we pay all ordinary carriage charges, but if it is requested that goods be sent by other than cheapest method all extra charges entailed are payable by the customer. All bags and containers are free in quotations on this page unless in exceptional cases some special and unusual type of packing is required. In the case of Beans or Peas where carriage is extra customers are reminded that as nett weights are sold postage should be allowed for a slightly greater weight than the quantity ordered to allow for containers and packing.

TERMS OF PAYMENT.

Where supplies are obtained through any Yates' Distributors terms are as quoted by them. In all transactions direct with us our terms are nett cash with order (including freight where chargeable) except where customer has an approved account with us or when a satisfactory Sydney business reference is given when ordering, in which cases payment is due on receipt of invoice. When remitting please keep a record of the numbers of any postal notes sent and do not include notes or coins except in registered letters. Country cheques should include exchange.

SUBSTITUTING.

On account of the difficulty in obtaining full supplies of many lines, and the failures of crops of others, we may, if unable to supply the exact variety ordered, substitute for it some other variety of a similar nature, which will, in our opinion, give satisfactory results.

If this is not desired, please mark order clearly: "DO NOT SUBSTITUTE."

15. FLOWER SEEDS—BULK PRICES

ALL CARRIAGE OR POSTAGE FREE

For meaning of daggers (†) and dashes (—) in price columns, see special note at top of page 5 in reference to Prices and Quantity Rates.

Commercial Flower Growers will now be ordering their main requirements for late spring, summer and autumn blooming, and we therefore include in this list most of the more important sorts which will now be of interest to flower growers. Our space is naturally limited, and we have had to leave out varieties of lesser importance, but customers will greatly oblige by sending us their enquiries for all varieties, whether listed herein or not, and we will be glad to give prompt quotations by return of mail. We are just issuing a new publication entitled "Yates' Seasonal Flower Notes and Trial Ground Observations"—a booklet specially compiled for the help and information of those engaged in commercial flower growing.
